PCSF model
version, producing code, unit (ohm m), CRS
Geometry
kind κ: G2, G3,
T or L
cells, nodes, coordinates
Model
resistivity (linear)
native values + encoding
uncertainty, sensitivity
Stations
name, x, y, z
line id
longitude, latitude
Topography
per station
or raster
Metadata
survey, history,
model record
(learned predictors)
one in-memory model, two encodings
PCSF
HDF5, binary, compressed
bit-exact
PCSM
plain text, comments allowed
